

**2018 Patient Centered Medical Home  
Quality Metrics for Family Practices**

Core Metric	Description	Threshold
<b>1. EPSDT (composite for older kids)</b>	-	-
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits ages 7-11 years</li> </ul>	Percentage of patients 7-11 years of age who had one or more well-child visits with a PCP during the measurement year	≥55%
<ul style="list-style-type: none"> <li>• EPSDT: Adolescent well-care visits age 12-21</li> </ul>	Percentage of enrolled patients 12-21 years of age who had at least one comprehensive well-care visit with a PCP or OB/GYN during the measurement year	≥45%
<b>2. EPSDT (Composite for younger kids)</b>	-	-
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits first 15 months – 6 or more visits</li> </ul>	Percentage of patients who turned 15 months of age during the measurement year and who had 6+ well-child visits with a PCP during their first 15 months of life	≥45%
<ul style="list-style-type: none"> <li>• EPSDT: Well-child visits at 18, 24, &amp; 30 months</li> </ul>	The percentage of members who turned 35 months old during the measurement timeframe who had at least one well-child visit within each of the following intervals: 2 weeks before 18 month - 2 weeks before 24 months, 2 weeks before 24 month - 2 weeks before 30 months, and 2 weeks before 30 month up to 35 months.	≥34%
<b>3. EPSDT: Well-child visits ages 3-6 years</b>	Percentage of patients 3-6 years of age who had one or more well-child visits with a PCP during the measurement year	≥65%
<b>4. Immunization composite metric (children and adolescents only)</b>	-	-
<ul style="list-style-type: none"> <li>• Childhood immunizations – Combination 3</li> </ul>	% children 2 years of age who had 4 DTaP), 3 polio, 1 MMR, 3 HiB, 3 HepB, 1 VZV, and 4 PCV by their second birthday	≥45%
<ul style="list-style-type: none"> <li>• Immunizations for adolescents – Combination 2<sup>1</sup></li> </ul>	% of adolescents 13 years of age who had one dose of meningococcal conjugate vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine and have completed the human papillomavirus (HPV) vaccine by their 13th birthday	≥16%
<b>5. Asthma medication management</b>	The % of members during the measurement year who were identified as having persistent asthma and were dispensed appropriate medications that they remained on during the	≥30%

<sup>1</sup> Starting in calendar year 2018, the immunizations for adolescents measure will include the HPV vaccine. This component is not included in calendar year 2017 measurements.

	treatment period. The rate included in this measure is the % of members in this age group who remained on an asthma controller medication for at least 75% of their treatment – Total rate	
<b>6. Adult BMI assessment</b>	% of patients, ages 18-74 years, with an OP visit whose BMI was documented during the measurement year or the year prior.	≥60%
<b>7. Weight assessment and counseling for nutrition for children/adolescents</b>	Weight assessment and counseling for children/adolescents ages 3-17, defined as:	-
<ul style="list-style-type: none"> <li>BMI percentile</li> </ul>	BMI percentile: % of members who had an outpatient visit with a PCP or OB/GYN and whose body mass index (BMI) was documented during the measurement year.	≥30%
<ul style="list-style-type: none"> <li>Counseling for nutrition</li> </ul>	Counseling for nutrition: % of members who had an outpatient visit with a PCP or OB/GYN who had evidence of counseling for nutrition during the measurement year.	≥30%
<b>8. Antidepressant medication management (adults only)</b>	% of 18 and older who were treated with antidepressant medication, had a diagnosis of major depression and who remained on an antidepressant regimen	-
<ul style="list-style-type: none"> <li>Acute phase</li> </ul>	% who remained on antidepressant medication for at least 84 days (12 weeks)	≥55%
<ul style="list-style-type: none"> <li>Continuation phase</li> </ul>	% who remained on antidepressant medication for at least 180 days (6 mo.)	≥40%
<b>9. Comprehensive diabetes care composite number 1</b>	% of patients 18 to 75 years of age with type 1 or type 2 diabetes	-
<ul style="list-style-type: none"> <li>Comprehensive Diabetes Care: Eye exam (retinal) performed</li> </ul>	% who had an eye exam (retinal) performed	≥40%
<ul style="list-style-type: none"> <li>Comprehensive Diabetes Care: BP control (&lt;140/90 mm Hg)</li> </ul>	% whose most recent blood pressure reading is less than 140/90 mm Hg (controlled)	≥50%
<ul style="list-style-type: none"> <li>Comprehensive diabetes care: Medical attention for nephropathy</li> </ul>	% who received medical attention for nephropathy	≥85%
<b>10. Comprehensive diabetes care composite number 2</b>	% of patients 18 to 75 years of age with type 1 or type 2 diabetes	

<ul style="list-style-type: none"> <li>Comprehensive diabetes care: Hemoglobin A1c (HbA1c) testing</li> </ul>	% with HbA1c test performed in the measurement year	≥85%
<ul style="list-style-type: none"> <li>Comprehensive diabetes care: HbA1c poor control (&gt;9.0%)</li> </ul>	% with most recent HbA1c level during the measurement year greater than 9.0%	≤50%
